RICH ORE FROM OLD PIOCHE

Strike in Manhattan Causes Salt Lakers to Rejoice.

NEWHOUSE FORMING PLANS

THEORY THAT SWANSEA VEIN RUNS NORTH IN TINTIC.

ROM reports that are daily reaching A. B. Lewis of the Manhattan at Pioche, it be taken for granted that are the present month closes a shipment of ore from that property bordering on the sensational will be made. A day or two since samples of rock from the face of a four-foot ledge were forwarded by Manager Freudenthal, and yesterday Mr. Lewis had them

From the character of the ore it was believed that it would run well, yet Mr. Freudenthal was hardly prepared for the surprise that the assays contained, viz., \$3.60 gold, \$45.8 ounces silver and 57.8 per cent lead. At present market prices this would make the ore worth about \$500 per ton net, and as Mr. Freudenthal is not addicted to the habit of deceiving himself when it comes to taking samples, there is little doubt that his initial shipment, which he promises very shortly, will maintain an average not wide of the mark indi-

cated by the figures given.

It is pretty good stuff, but Manager Freudenthal says no one need worry over his not having the goods to de-liver to market, as every shift's work in the vein makes the showing all the

LOWER TINTIC'S FUTURE. Theory of Ore Channel Extending North From the Swansea.

Mammoth, July 2.—Developments in the Manhattan and the Lower Mammoth properties during the past sixty days have awakened keen interest in this camp, and have led to the belief by many mining men that the ore fis-sure which has been found in the former may prove to be the link which will connect the Swanseas of Silver City with the great ore system on which are

This belief has been strengthened by developments on the lower levels of the Lower Mammoth mine, where sulphide ores, bearing a strong resemblance to the product of the Swanseas, have recently been encountered. The ores in the upper levels of the mine are found in an iron gangue, which appears nearer the surface in the Manhattan, and which also bears a close resem-blance to the surface ores in the old

It will be remembered that, after working out these oxide ores which octhe mine was abandoned, the sulphide ores with which they were replaced being of a very low grade. Some years later the mine was reopened, and as depth was attained, the values in lead and silver increased, and the property developed into a bonanza. About four years ago extensive operations were begun in search of the Swansea vein to the north, where it was supposed to have crossed Mammoth hollow. Several thousands of dollars were expended without result by the Eureka-Swan-sea Extension Mining company, the the-ory of the management being that this Swansea ore zone connected with the great system extending across Eurek

The ore-bearing lime of the Lower Mammoth, which is fractured by two separate parallel ore-bearing fissure extending north ten degrees east, con-tinues on its course through the Manhattan, the ore bodies extending for 400 feet to the south without a break. The Manhattan is but a small fraction in area, but may yet be the means of upsetting some ancient theories and forming the nucleus of another big pro ducer that will find great chambers of ore where, in the opinion of the wise acres, they could not exist.

In this connection it is interesting to note that an option was given recently to a well known Tintic operator on the Damficare group, adjoining the Man-hattan on the south. It is believed that the same gentleman has secure terms on which he may purchase the Anita claim, lying between the Man hattan and the Lower Mammoth, and there are good indications that there will be something doing in that quarter in the very near future

BINGHAM MINING SUIT.

Highland Boy Company Claims Petro's Ore Body.

suit of the Petro Mining company vs. the Highland Boy Mining company et al., the latter yesterday filed a counter claim in the district court denying the charge of the Petro com-pany that they have taken \$50,000 worth of mineral rock from ground be-longing to the plaintiff. In the counter claim the Highland Boy company alleges it is the owner of the disputed property, claiming the Petro company working on the defendant's property; therefore, an injunction restraining the Petro company from further work pending the ultimate disposition

of the case is prayed for.

E. O'Reilly, C. K. McCornick, Charles
H. Post, W. R. Smith and C. L. Dignowitz, named in the original complaint as defendants, filed answers asking that the case against them be dis-missed on the ground that they have no right or title in the disputed prop-

NEWHOUSE'S ARRIVAL

Mining Magnate, With A. B. Lewis, Goes to Beaver Mines.

Arriving yesterday morning from Montana, Samuel Newhouse, the directing magnate of the Boston Consolidated and Cactus properties, devoted the entire day to conferring with his associates in the former company's of fice. In the evening Mr. Newhouse, accompanied by A. B. Lewis of the Majestic company, left on a hurried trip to the copper mines in Beaver county. Mr. Newhouse pleaded that he had nothing to announce until his return from the south, and this lends strength to the report that he is looking over the ground before determining upon the projected 1,000-ton concentrator for the Cactus.

Mr. Lewis may possibly find time to run over to Pioche and inspect the big Manhattan strike before returning, and after having gone over his Beaver county mines and attended to the busi-

tension of the Belle Marsh vein, which was located by Salt Lakers during the rush at the opening of the Fort Hall reservation. The rock brought for

No doubt exists as to the value of the copper ledge, but the test made yesterday was for gold, the quartz at the surface indicating the presence of the

Improvement in Drift.

Alviras E. Snow of the Martha Washington management yesterday re-ceived a telephone message from Su-perintendent Irish stating that the new find of ore in the Antelope drift had widened from two feet to thirty inches. Since the day before the two men working in the drift had taken out four tons of the ore. The advices by wire further stated, Mr. Snow said, that the north drift looked about the same, exosing an eight-inch streak of mineral carrying from thirty-five to forty ounces in silver.

Smelter Trust Not Worried.

Manager T. R. Jones of the American Smelting & Refining company re-turned home yesterday after a brief business trip to Denver, where he went to confer with his fellow officials on the smelting situation. He declared he brought no news of local interest. As to the fight instituted by the state of Colorado against the so-called trust, Manager Jones stated that it is causing the company no worry whatever.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported through the banking house of McCornick & Co., aggregated \$101,500, as follows: Silver and lead ores, \$90,700; bullion, \$10,800.

During the month of June the Commercial National bank received for consignment to the smelters ore to the value of \$19,250.

Metal Market.

Silver, 52% cents per ounce.

MINING STOCK MARKET.

Large Volume of Business Was Done Yesterday.

The brokers took fresh hope of better business coming from yesterday's dealings. On the exchange, 29,212 shares were sold, the selling value reaching \$82,193.25. This was the largest volume of business done for many days past. But the week's business will be necessarily small, for the board of governors has decided that the Fourth of July shall be followed by a vacation on Saturday, making two holidays without a call on the exchange. Some of the high-priced stocks were dealt in yesterday, notably the Daly-West, 460 shares selling at from \$48.20 up to \$49 at the close. Three hundred Daly went at \$2.03. Mammoth stiffened under the more active demand, 1,300 shares selling. The price at the opening was \$1.23½ and closing at \$1.25. Con. Mercur was in demand, and fifty-two shares sold at \$2. Yankee was traded in at \$1.15, and 300 shares were sold at that figure. On the open board 400 shares of Daly-Judge were snapped up at from \$6.80 to \$6.75. For the most part, the higher priced stocks scored small advances, a notable exception being Lower Mammoth, which slumped to \$1.04 at the close, a fall of 5c since Monday.

Weakness characterized the low-priced stocks. California opened weak, but closed with a fractional advance to Tuesday's closing quotation, 13c. May Day found buyers at 19c, and Century at 22c to 31c. A small block of Carisa came out at 25c. Galena was dealt in at 18c to 18½c, and South Swansea at 32c.

On the strength of the reports of finding a new ore body in the Martha Washington, this stock advanced from 2½c on Tuesday to 3½c at yesterday's close, 6,000 shares passing from seller to buyer.

Uncle Sam was traded in at 28½c down to 27c, and a block of Ben Butter went at 10c. Sunshine sold at 25½c, Sacramento at 27½c up to 28c, and Ingot at 4¾c.

Closing quotations and sales were as follows: business coming from yesterday's dealings. On the exchange, 29,212 shares were ocated the Lower Mammoth, Ajax and

Three cars of Alaska, Tintic, ore were received yesterday by the Conklin sam-pler. James Duffy of the D. & M. property is down from that Park City mine. He is satisfied with the progress of devel-

opments.

The Taylor & Brunton sampling works yesterday received five cars of South Swansea ore, one of Mammoth and one of Bonanza, Tintic.

of Bonanza, Tintic.

Manager Jacobs of the Ben Butler reports that the ore bins are full of ore in preparation for another large shipment from this Bingham property.

President Chipman of the Uncle Sam went to Tintic yesterday morning to examine the property and to study the situation with reference to installing a mill for treating the second-class ore.

A shipment of gold sulphides arrived from the Dexter-Tuscarora yesterday, and a lot of bullion is due today. When the latter arrives, the result of the June clean-up will be known.

Manager Rood of the Ontario reports

Manager Rood of the Ontario reports the work of sinking the No. 3 shaft toward the 2,000-foot level progressing satisfactorily. With the shaft down another 300 feet or so and drifts run a vast area of new stoping ground will be available. On his return from the east, Colonel Nicholas Treweek took yesterday's train for Park City to examine late develonments in the Wabash, of which he is the controling spirit. Matt Daugherty will join him today. On their return to this city it is expected that some interesting information will be disclosed.

ANOTHER MORGAN MERGER.

Louisville & Nashville to Absorb Chicago, Indianapolis & Louisville. New York, July 2,—J. P. Morgan & Co., as depositories for the Louisville & Nashville Railroad company and the Southern Railway company, have announced, according to the Tribune, that the holders of more than 51 per cent of the capital stock of the Chicago, Indianapolis & Louisville Railway com-pany have accepted the offer made

them on May 20 by the two companies Th deposit constitutes a final ac ceptance of the offer of purchase. The time for depositing stock is extended to and including July 31, after which date stock will be accepted, if at all, only upon such terms as the purchasing companies may prescribe

AMERICAN TO CONSTRUCT TROLLEY LINE IN ENGLAND.

New York, July 2.-Thomas Nevins of East Orange will sail on Saturday to take up the work of constructing 147 miles of trolley between Liverpool and Manchester, and embracing side lines touching many populous towns. The work will entail an expenditure of \$20,000,000, all of which will be furnished

by American financiers. Mr. Nevins, who, with his father, is prominent among the pioneer traction

contractors of the east, said:
"The English do not seem to have
awakened to the possibilities in electric roads. We look upon England as containing our principal interests nowadays, because the field there is so largely undeveloped. We have done a great deal of work in this country, but it is pretty well supplied now, and the field operations are correspondingly restrict-ed. In England it is practically unlim-

KANSAS RIVER OVERFLOWS. Topeka, Kan., July 2.-The Kansas. iver at this point has overflowed its banks, and is running over the city park at noon and still rising two inches per hour. A telegram from Manhat-tan, Kan., says the river is rising a foot an hour, and great damage is feared

when the additional volume of water reaches this vicinity tonight. The Wolff packing nause has been compelled to suspend operations, owing to the flood. One of their smokestacks, 100 feet high, has fallen. The city stree railway people are fearful that their bridge over the river is going out, and are anchoring it as best they can.

SECURITIES ARE STILL INACTIVE

Large Operations in Wall Street Money Markets.

KLONDIKE GOLD ARRIVING

THAT STOCK TO RISE.

New York, July 2.—The stock market was extremely dull today and the only notable activity was concentrated in a few stocks. In some of these there were new developments to give an ostensible cause for their strength. In others there was an appearance of manipulation with the purpose of sustaining the general market.

The speculation was light, owing to the large operations in progress in the money market, owing to the July settlement, and of syndicate operations. There were large transactions all day in Missouri Pacific, which sold ex. the semi-annual dividend of 2½ per cent, but the price range all day was restricted to a fraction. Louisville was in active demand at the extreme advance of 3½.

The movement seemed to be based upon the formal announcement that the purchase in behalf of the company of the Chicago, Indianapolis & Louisville was in effect. Colorado Fuel made another spurt, which was supposed to be due to a struggle for control, but which incidentally involved forced buying by a distressed short interest. Short covering was also an element in the advance of Sugar, and the rise in the price of raw sugar also helped that stock.

The buying of Amalgamated Copper was attributed to a more confident feeling over the trade outlook. The United States Steel stocks were firm because of the last quarter. The statistics of iron and steel production for the past year issued by the American Iron & Steel association were regarded as an astounding exhibit of active and prosperous conditions in the trade. The steel stocks, nevertheless. met a considerable volume.
